Cristallight Software - Barcode Make For Mac

[DOWNLOAD HERE](#)

Mac barcode generator will easily create any number of colorful barcode labels in your own style, of any size, or shape. Theres no need to spend money for purchasing costly barcode stickers for your business! Use iBarcoder to design and print barcode labels, stickers, tags on your mac with a few mouse clicks. Also you can use this mac barcode software as Datamatrix and QR Code generator. Create barcode graphics for retail packages, books, stickers, and more. Smart, intuitive mac barcode generating software: - Create professional barcoded labels with a few mouse clicks, - Live preview feature: start typing to create your barcodes, - Modify your mac barcode by changing types, sizes and other attributes intrinsic to a certain barcode symbology, advanced tools make customizing your barcode easy, - Print barcodes directly to your printer using standard Avery label formats provided, - Create and save your own custom label formats, - Export barcode as a high-resolution (up to 4800 dpi) mac image file, or vector graphic, - Make the desired Font and Color settings, - Copy, then paste finished graphics right to Adobe Illustrator, InDesign, Photoshop, or other software from mac clipboard. Add text, borders, images, and more: Add various objects and design elements like text boxes, image boxes, rectangles, ovals and lines to your labels. Type in the necessary text, insert the desired images, logos, illustrations to create the professional barcode labels for commercial use. Sequential barcodes for catalogs and retail operations: The powerful Sequential Numbers feature allows you to define the sequence in which barcodes are printed or exported. The barcode sequences can be created in two modes. The Counter mode creates the next barcode automatically constructing the next barcode data string from user defined prefix, starting number and postix parts using the increment value. The Text File mode allows select a file containing the set of data strings to generate barcodes from.
