

Advanced Dropbox Uploader

[DOWNLOAD HERE](#)

The Advanced Dropbox Uploader system is a fully functional, easy to install and customisable Dropbox Upload form that you can use to allow your clients or friends to upload files directly to your own computers hard-disk without having to use any complicated upload sites or FTP . Every project you work on, either personal or at work, will more than likely require clients or associates to send you artwork, assets, wireframes, documents etc Now you can give your clients one easy link where they can simply upload the files and send them directly to your computer via Dropbox.
