Keystroke Spy

[DOWNLOAD HERE](#)

Keystroke Spy is an extremely easy to use computer monitoring product. Keystroke Spy, while being able to log all keystrokes typed by users without them knowing, can also be set to log keystrokes typed only in specific applications. While allowing you to see who users are talking to, what websites they visit, emails they send, and more, Keystroke Spy can also be configured to email you when certain words are typed - like names or addresses.Keystroke Spy specifications: Download Size: 1160 KB   Minimum Memory Required: 32MB Minimum Hard Drive Space Required: 3MB Processor (CPU): 133mhz+ Other System Requirements: 2MB memory, 16MB Ram, Pentium Class PC Keystroke Spy supportSupport email: support@spytech-web.comKeystroke Spy manufacturerSpytech Software and Design, Inc.168 Tyler Road South55066 Red Wingspytech-web.comTags: Keystroke Recorder, Spy Software, Computer Monitoring
