Online Source Code Editor By: Mieke Janssens Edmund's notes: Install this script on your web host and you can easily edit your files online, and directly to the server. If you're always going abroad and jumping cyber cafes, this script can come in handy. This means you don't have to install a new FTP or anything like that just to edit your files when abroad or away from your usual PC. A user guide is included, and easy to install instructions are within. Master Resell Rights included!
