Finally someone reveals online moneymaking techniques that get you into profit from day one...

"Introducing The Cut-Throat Moneymaking Manual That Myspace Tried To Ban... The Techniques & Strategies I Reveal In This Guide Are So Effective That Myspace Tried To Ban Me From Revealing Them To The Public! From: "The Space-Invader" Dear online marketer... Myspace marketing is one of the fastest and easiest ways to make money on the whole internet. If you didn't already know that, you're about to get a crash course... Where else can you get thousands and thousands of targeted visitors within days or hours of starting out? And what about getting traffic like that for hardly any effort? You need to forget everything you've learned about IM so far. Forget SEO. Forget PPC. PPC is for suckers. Why bother with any of that time consuming, expensive junk when Myspace can easily supply you with all the traffic you need for just about any niche? You have heard of Myspace right? Everyone has. It's huge. There are hundreds of millions of members, and more joining each day. Most people have no idea how easy it is to make a ton of money from though. AND even most internet marketers are in the dark about this. Let me tell you, the guys that are in the know...well let's just say they aren't too keen on this stuff becoming public knowledge... The Perfect Solution For A Struggling Newbie Marketer When I first started trying to make money online, I had no idea what I was doing. I'd bought a ton of guides and ebooks that claimed to make me rich in 5 minutes flat...and obviously none of them worked. It was so frustrating, I just seemed to be bouncing from one thing to another... I tried everything, list building, PPC, simple SEO, joint ventures, just about every idea I could find. The problem was that none of it really did what I needed it to do: Make me a ton of money in a short time without me spending weeks learning the ropes and building things up. Sure, stuff like that is great for some people...I mean the whole internet marketing thing is just a hobby for some...but not me. I wanted money, and I wanted it fast. But it never occurred to me to use the social networks. To be honest, I was completely blinkered about such places. It wasn't until some guy on a forum tried to sell me a way to make money from Myspace that I even checked the place out. Call me ignorant or whatever, but I had no real idea what Myspace was. I thought it was just some kind of website for teenage girls to chat or whatever, so I'd always completely avoided it. Embarrassing huh? So anyway I

bombarded the poor guy with questions. To be honest, I think he just got sick of my constant questions, so he put together an email with a quick outline of a simple method of making money from Myspace. I ran with it, and I was completely shell-shocked when it actually made me some cash. Not a huge amount, maybe like \$10 or something from those first couple of hours, but that was enough to make me realize there was some potential here...after all, if you can make \$10 online you can make \$10,000... Finally My Crazy Obsessive Compulsive Nature Was Paying Off... From there it got intense. You could say I got obsessed. Okay I'll level with you...I got totally obsessed... I put in hour after hour, trying new ideas, new techniques, old ideas with a new spin, just about everything I could think of. Before I knew it I was making regular commissions and affiliate sales...I got my first ever commission check through the mail due to Myspace. I'd dreamed about getting that first check for months. I used to see people flashing their Clickbank screenshots on forums and stuff, and I was crazy jealous. Believe me, when that first check actually arrived I was hooked. It was about that time that I started seeing a few Myspace marketing guides being released. This got me even more excited...what's better than adding to your current income by including someone else's ideas and angles on things? Unfortunately it didn't turn out quite that good... You see, the marketing guides, every single one that I read, were just full of junk. Useless junk. So full of filler that it wasn't funny. And even the actual techniques they were teaching were so lame they would barely work. I mean you could literally get better information for free from just about any marketing forum online... I guess people were just churning them out quickly because Myspace was the hot thing at the time... The Brutal Truth Is That These Guys Were Taking People For A Ride And that got me thinking...all around I was hearing people saying how tough it is to market on Myspace. I'm hearing things about the Myspace Police, closed accounts, blocked IPs and you name it, when the whole time I was raking in commissions every day from my own techniques I developed myself. I'm basically an honest guy, and I really wasn't too happy with the way that the other everyday honest folk like me were being taken for a ride with all the second rate information out there. It really bothered me, until one day I decided to put together my own guide. I decided to forget about all the tired, crappy guides out there telling you to do all the same old recycled junky things, and instead put down every single technique that I'd learned and developed myself. In short, I opened up and gave away every single piece of Myspace marketing gold that I use every day to make those fat checks. And that's what you're looking at today... Introducing: The Space Invader's Handbook The Space Invader's Handbook is just about the most definitive guide to

Myspace marketing around. That's why John Connor, owner of BotTower(creator of the leading Myspace Bot Spacestation) had this to say about it... You see, that's the key with the whole Myspace thing...keeping it all under wraps and not letting anyone know what you're really doing. People assume that making money from Myspace and the other social networks is just a quick fix... But it really doesn't have to be that way. If you're smart, and you follow the crystal clear, cookie cutter examples I'm going to give you, you'll see exactly how you can turn this into a long term, high profit and low cost business. This thing is a goldmine, it's just that most people don't have the right tools to mine it. Well congratulations, you just found those tools, and they'll make you rich if that's what you want... But Before You Go On, You Need To Get One Thing Straight... Listen, before I reveal how you can get your hands on this powerful manual, there's something we need to get straightened out between ourselves something very important you need to understand: The Space Invader's Handbook is not some cheesy let's all be friends and make money online book. Not at all. You won't find any junk in here about sticking to what you love, and writing ebooks about your hobbies, and all that other garbage the so called gurus try to stiff you with. This is cut throat stuff. Grey hat, black hat, call it whatever color you want...I just call it profitable. Ridiculously profitable. Where else can you enter into a niche and make money on your very first day? Build up a list of thousands of legit opt in subscribers in just a few weeks...for free? This is hardcore...you're going to know the real heavyweight secrets that will let you push the other marketers around and bully them right out of Myspace altogether... So how much would you expect to pay for

something like that? It's a tough question to answer, so let me put it into some very real terms for you: How much would you pay me to knock at your house and hand you a crisp \$100 bill each morning for the rest of your life? How much would you give to know that come rain or shine, I'd be knocking each morning with your day's wage? That's worth a pretty good chunk of cash isn't it? You'd never worry about paying bills or anything else ever again...even if I charged you \$10k for it, you could pay me and retire tomorrow...not a bad deal huh? And the Space Invader is kind of like that. Because you can easily put these secret techniques to work for you and make \$100 a day. In fact, it wouldn't be too tough for you to make \$300 or \$400 a day, if you put your mind to it... So with that in mind, I decided to charge \$197 for it. Some of the better Myspace software is available at \$197, and I thought this would make a great deal... But then I remember that I wanted it to be accessible to just about anyone. After all Myspace is one of the easiest places to get started making money online, so I dropped the price so that literally anyone can afford it... To \$37. \$37 for all 117 pages of moneymaking content. Think of it this way...if your bank manager offered you a new savings plan where a \$37 deposit generated you \$100 a day return you'd jump on it wouldn't you? Well that's what I'm offering here. But if you want a copy, you better act right now... I took this off the market once before after Myspace threatened me with legal action, so I can only keep these doors open for a very limited time...this page may literally close at any moment, so hit the order button below to get your copy right now. Your 30 Day Iron Clad Refund Guarantee Just when you were thinking this deal couldn't get much better, I've decided to add a ridiculous guarantee...try The Space Invader's Handbook for 60 days...if you don't like it or can't make money with it in that time, you get your money back. No questions. That guarantee makes this whole thing a no risk bargain. Grab your credit card, hit the order button above, and give it a spin. See if you really can make money with zero experience and hardly any effort. If you can't I'll give your money back. But do it now, because it's not going to be around much longer... To your success, The Space Invader P.S.- You've probably tried a few online money making ideas by now maybe you've even lost some cash on lame ebooks and poor ideas. Isn't it about time you tried the one thing that's super accessible for marketers of all levels? P.P.S.- Right now your life has two possible futures...one where you get up at 7am for work tomorrow and go through the same old crap. The only thing that changes is your shirt. But the other is where you buy this manual and start making some real money. Quitting that job. Working when you want. Spending some quality time with the people you love. Doesn't that sound better? P.P.P.S.- Look, I'm going to reveal one of the

big secrets the gurus never tell: Even the best wealth creation manuals just don't work for some people. They don't have the time, don't make the effort, whatever. But I've given you a no strings guarantee, so what have you go to lose by trying this one out?
