

# Backlink Flood (with Rights)

[DOWNLOAD HERE](#)

Getting backlinks to your websites is absolutely vital if you want them to be ranked well in the Search Engine listings, and receive free targeted traffic from them. For the benefit of those who do not know what backlinks are, these backlinks are links that link to your websites from other people's websites. The more backlinks your websites, the more "important" the search engines will perceive your websites to be, and thus they'll rank your websites high up in the search engine rankings. However, that does not mean that you go out and spam other peoples' websites by posting backlinks to your websites all over other peoples' websites. This is because search engines are smart enough to detect whether or not you are spamming and if you are, then they'll delist your websites from their listings and you can never receive any traffic from the search engines anymore. You'll need a proper backlink plan in place - And that's how "Backlink Flood" comes in. "Backlink Flood" is a proven-to-work blueprint that will help you get your websites ranked well for highly valuable and competitive keywords, as well as helping your websites receive tons of high-quality backlinks and traffic. The techniques documented in "Backlink Flood" package are only meant for serious online entrepreneurs (which I'm sure you fall into this category, if not you wouldn't be reading this post) who wants to build a long-term online presence with your websites, and getting free targeted traffic from the search engines and cash for you every single year. Key Learning Pointers In "Backlink Flood" - Get your links noticed by Google and other top search engines in hours, not weeks... And start driving your websites up the SERP's and receiving organic traffic in the least amount of time possible... - Parasite hosting is using 3rd party websites to post your content and links... It's nothing new, but most people don't have a clue as to how to use it the right way and create a powerful linking system that actually produces results and doesn't get flagged as spam. - If you thought linking directly to your site from 3rd party sites was enough to get the job done, you're probably not ranking as highly for keywords as you'd like to be, and chances are you're missing this critical tool in your SEO arsenal. - Think beyond direct linking, go one step further than building an authority wheel, and finally push your traffic and rankings to the next level using Multi-Level Linking... And make sure you do it right the first time so all of your hard work doesn't go to waste. - Absolutely, and anyone who tells you otherwise doesn't know

what they're talking about... However, there are a few measures that you can take to make sure that it never happens to you, you can read all about it on page 26. - This is another major area where people mess up and throw away all of their hard work... And it's probably the most critical step in all of SEO, trust me, you want to get it right the first time... That's why I've included a special software and separate guide specifically to ensure that you're performing your keyword research in the correct manner. - I'll go into more detail below, but I'm also including 2 of my own tools (namely "Article Flood", and "Keyword Flood" which I've also included in this package) that I personally use to cut hours of work down to just a few minutes, and they'll help you to do the same. - I'll teach you how to use Web 2.0 properties the RIGHT way... So that you get high quality links from high authority domains, without being flagged as a spammer and getting your domain penalized. - Very few people I know realize just how powerful social bookmarking can be... Again, there's a right way and a wrong way to go about it. I'll show you how to use social bookmarking in the most effective way possible. - What sites pass link juice? How far does it go? What gets you flagged as a spammer? How you can protect yourself... The anatomy of a backlink, why anchor text works the way it does, and much more...
