

# Web Page Language Translator

[DOWNLOAD HERE](#)

Google has created a fantastic set of tools to allow you to translate any web page from one language to another. However, for most, it is a bit difficult to integrate into your existing site. Web PAGE TRANSLATOR does all the work for you! All you have to do is enter the URL that you wish to translate, tell what language it is in, and what language you want it translated to. Web PAGE TRANSLATOR will then automatically create the web page for you! Not just the script, but will actually create all the html needed. Just enter a file name and boom, you're done! Tags: translate, web page language translation, web page language translator, web page translate, web page translation, web page translator, web page translators, web translator,
