Create PDF Files From Any Printable Document in a Few Simple Clicks! "Finally There's an EASY Way To Publish Stunning PDF Files, Without Wasting a Lot of Time and Money" RESALE RIGHTS INCLUDED! From: Michael Hopkins RE: Creating Free PDF Files Dear Publisher, As you know, PDF is fast becoming the format of choice for ebook authors and developers around the world. That's not surprising. Surveys continue to show that PDF is preferred by an ever-growing majority of ebook readers. And it's easy to see why PDFs are so popular... * They can be read on just about every computer in the world. * They are easy on the eye, because they recreate the look of a printed page. * PDF ebooks always display correctly on the reader's computer because fonts, graphics, special characters, and so on are all embedded into the original PDF file. * PDFs are easy to print out and always give a reliable reproduction of the original document. * They can contain links within the book as well as links to websites. * PDFs are very secure. In short, when it comes to electronic publishing, PDF is where it's at. The only downside to PDFs is that they can be both complicated and expensive to create. Until recently the only software available was Adobe Acrobat PDF Writer. At a retail price of around \$250, it isn't accessible to a lot of people. On top of that, it's far too complicated to use. The same is true of most of the other PDF programs on the market. To put it briefly, getting your written work into PDF format remains a major headache for most average users. Not any more! "Now You Can Create Stunning PDF Files in an Instant - Without the Expensive Software!" Five minutes from now you can start transforming any of your documents - text, images, web pages, or whatever else you want - into universally readable PDF files. How to Create PDF Ebooks for Free! You'll find full details in my new ebooklet, imaginatively titled "How to Create PDF Ebooks for Free!" If you can type an email, you can start publishing your own Media-Rich PDF Ebooks in just minutes. But don't let its simplicity fool you! The PDFs you make will be every bit as professional, secure and interactive as the ones you'd make using other expensive programs. Just Look at the Features You Can Add to Your PDF Files... You can include active links to websites or email. You can include pictures

or charts and other multi-media elements. You can include bookmarks to make your PDF easy to navigate. You can password-protect your PDF document with 128-bit encryption. You can disable the copy/paste function to prevent theft of your work. You can disable the print function. You can secure sign your PDF using your digital certificate. You can automatically add page numbers to your ebooks. You can add watermarks (stamps) to the background of your PDF pages. You can rotate the pages (very useful if you're creating a PDF from, for example, an Excel file or a PowerPoint document). You can combine several different documents into one PDF file. (Use 'batch' mode and you can even combine multiple documents into one PDF while you're away having a coffee!) You can embed specific fonts into your PDF. You can specify the page sizes for your ebooks. You can create an unlimited number of full-featured PDF files. No restrictions, no royalties, no 3rd-party ads. And more... In short, you get all the features you'll need for your PDF Ebooks - without the huge learning curve. And it doesn't matter what software you've written your original document in.
