Real-Time Statistics About Visitors to Your Website Web based E-mail & control panel INS has an
experienced web development team with a large number of web sites to its credit. INS understands that a
web page not only presents the business to the world, but also that the Internet is an important medium
for transacting with a company's stakeholders. Because of this, INS maintains a high standard of quality
in all sites that it develops, in terms of aesthetic appeal, functionality, navigation, and overall effect. When
starting any project, our first step is to understand the purpose of the site. By making sure that we are in
tune with our client's needs, our Project Managers are better able to guide the development process, from
proposing features that should be offered on the site to basic idea conception, site development and
hosting. After the site has been completed, INS remains involved, offering site maintenance and back-end
support. Our clients rest assured knowing they have partnered with a professional, reliable, organization
to manage their Internet presence. Visit Live Portfolio inspk.com/website_portfolio.html----
