Finally, Discover How You Can Quickly and Easily, Create and Edit Professional Graphics Thru This Step-By-Step Video Course... Using Free Graphics Editing Software! It doesnt matter if youre not tech savvy. Simply watch over my shoulder, step by step, and click by click, how you can create beautiful designs and graphics... Starting today! As long as you can point and click with your mouse; and more importantly follow me over my shoulder, then you will have no problems being able to edit and produce professional graphic pieces after going through this quick and easy video course. Video #1: Introduction to Graphics Editing In this video, you will be given a quick overview of the video course as a whole, what tools you will need, how it all works, and much more. Having an idea of what well be discussing in detail and how each video contributes to this video course will enable you implement this system effectively to start your journey towards graphics editing. Video #2: How to Download and Install Paint.NET We will be using Paint.NET, a freely distributed piece of software that is like a scaled down version of Adobe Photoshop. Ive used other graphics editing software tools like GIMP, which are great, however I personally have enjoyed using Paint.NET. Youll be shown where to download Paint.NET, how to install it, and get it ready to be used. Video #3: Understanding Paint.NETs Features and Tools Just like any software, knowing and understanding the features of how it works and how to use it correctly, will help you save time trying to figure them out later. Well go through the process of creating a basic graphic. Dont jump two feet in without knowing how it works and how to use it. This video will help speed the process up. Video #4: Catchy Text and Mirroring Creating catchy text headlines, sub-headlines, and understanding text mirroring will allow your text to catch someones eyes. Its the new trend of graphics, graphics that come to life. Ever wonder how people were able to create text that catches your eye or text that has a cool mirror effect? Well youll learn just that in this video. Video #5: Catchy Shapes Its a known fact that the human eye looks at arrows and other shapes. Similar to the road you drive on, we look for shapes to guide us to our location. Whether you operate a business or youre at your job, learning how to create and use shapes effectively can help you achieve your goal. In this video, youll learn how easy it is to do just that. Video #6: Remove the Background of a Picture Would you like to remove the background

of a picture and replace it with something else? Imagine that youre standing in front of a store. You really like the picture of yourself, but you want to remove the store. In this video, youll learn how to do that easily using Paint.NETs editing software. Video #7: Layers - Making your editing life easier Layers are your friends. Why? When youre editing a photo, and you want to put a picture behind or above another picture, this is where layers come from. Imagine you have several layers of transparent plastic sheets and they have a photo. You can simply re-organize the layers to make your picture look nicer and cleaner. In this video, you will learn what layers are in more detail, how they can help you, and how to use them effectively. Video #8: Plugins - Making the software more powerful Within the editing software itself lies a powerful system. However, if you would like to add more effects to your arsenal, then youll want to watch this video. Adding plugins is not hard to do, but requires a few steps and youll be able install them in no time. Video #9: Banners and Headers How would you like to learn how to design banners and headers? At this point in the video series, you should have learned a lot of basic and important elements of this powerful editing software. Now its time to take it to another level with banners and headers that will make your business or work look more professional. In this video, youll learn how to make your banners and headers shine and catch your viewers eyes.
