get the EMU Orbit Sound kit to play on any program that take soundsfont. which mean you can use it with Fl studio, reason, battery. apple logic and my many more. The Orbit is first in E-mu's new line of dance modules. This is strictly engineered for the techno artist. It has 8 MB of samples of all the great vintage analog sounds plus many familiar and typical sounds used in house, hip hop, trance, and techno. It includes an essential digital VCF-like filter that is (on many presets) usually controlled from the modulation wheel on your keyboard controller! It's great for filling tracks with lush sweeping pads, or trancing along a 303 bassline pattern and filtering away. It is a beautiful golden single-space rack unit with a big easy to read LCD. Its sounds are, well they're digital so they are a little harsh and 'tinny' but add a little 'verb and some delay and it sounds damn good! It is already being used by lots of techno artists around the world including Todd Terry, Roni Size, ATB, and Orbital. Digitally delivered right to your computer so you can start making music fast. Please note that sound kits are delivered electronically. Payments are made through Paypal and download links instantly sent to you via email. If enabled, please make sure to check your spam filter, especially if you are a Hotmail or Yahoo user. We highly suggest the use of WinRar for extracting compressed files.
