

Filestream Safeshield

[DOWNLOAD HERE](#)

SafeShield protects your computers from virus attack and unwanted changes. Using the virtualization technology, SafeShield lets you work on a working copy of Windows so the original is isolated from intruders and unwanted changes. Changes can be dropped by a simple restart of the computer. It is a must-have utility for protecting computers that are being shared. You will never have to worry about someone doing something damaging to the computers. FileStream SafeShield specifications: Download Size: 1739 KB Minimum Memory Required: 1GB Minimum Hard Drive Space Required: 5MB FileStream SafeShield supportSupport email: support@filestream.com FileStream SafeShield manufacturerFileStream, Inc.
