FILERECOVERY for Windows is a safe and affordable undelete solution that retrieves files from digital media. This do-it-yourself software will scan the drive to create a savable file list. The non-destructive, read-only application will not write or make drive changes. With directory structure preservation, even under NTFS, media is quickly organized and restored. Rescue files easily with the deep scanning engine that other products miss. FILERECOVERY for Windows (PC) specifications: Download Size: 9646 KB
