"Does Your Backup System Protect Your Online Web Business Every Day -- And Every Night? (Even When You're Sleeping?)" Amazingly Simple Automated Software Can Virtually Guarantee You Never Lose Your Databases And The Vital Information It Contains! Back It Up Daily, Weekly, Monthly and Even Email It To Yourself Automatically! It Will Even Back Up Your Data to THREE DIFFERENT LOCATIONS! Automatically! Before you learn more about this backup system, let me tell you a little story... I was going through and cleaning my mailing list in an autoresponder script installed on my website when . . . BAM! GONE!!! Disappeared! Vanished! The database that stored all of my subscriber information became corrupt, destroyed my list and damn near destroyed my business! I called my web host in a panic and sure enough - the database server took a nose dive. And sure enough, NO! They could NOT recover my data! This is a common enough tale. Could have even happened to you. If it did, were you backed up? *** Before you read another line, you need to take a look at this incredible video. You will see how effective Database Backup Generator is when I destroy my list . . . on purpose! That's right! What once threw me into a state of panic, I will do on purpose. Right before your eyes. Just to prove a point! Come see how crazy I am . . . Start Demonstration *** Resellers, Please Note: Feel free to link to this video demonstration, but in doing so your potential customer will see my version in the video. I suggest you make your own flash video in much the same way as I did. It is powerful . . . (Don't forget to remove this statement) I know what you're thinking. You're not worried because your web host backs up your database, right? They All do. Is It Important For You To Know Your Business Is Backed Up? It is becoming commonplace now. More and more web hosts are NO LONGER BACKING UP their customers sites or databases. All those resources are expensive. They will most likely tell you to back up your own site. I know because my OWN web host once sent me an email advising me to back up my own data because they no longer do that. Or maybe they do back your website up... for an EXPENSIVE recovery fee or maybe they only do it once a month! Sorry bub, but in my business I can't lose a month's work or I'm out of business! Even though most web hosting control panels offer manual backups...we have yet to

find one that offers the MOST important feature ... AUTOMATIC Backups! That's what prompted me to develop Database Backup Generator. The whole idea behind my script is... SET IT, FORGET IT and RELY ON IT! Database Backup Generator will automatically backup your databases for you and... you don't even need to lift a finger! Database For: What It Can Cost You with No Protection: Protected With Database Backup Generator: Newsletter (Your Opt-In List) Your subscribers and their loyalty Your advertisers. Any sales of your own products. Affiliate program revenue. Hundreds, even THOUSANDS of dollars. Untold hours of time. Click "Restore". Back in business. Less Than Five Minutes. No subscribers lost. No advertisers lost. No revenue lost. Retain subscriber loyalty. Membership Site Member information. Billing information. Customers. Untold hours of time. Hundreds, even THOUSANDS of dollars. Click "Restore". Back in business. Less Than Five Minutes. No members lost. No revenue lost. Retain memebrship loyalty. E-Commerce Site Billing information. Customers. Your entire storefront. Your product list. Hundreds, even THOUSANDS of dollars. Untold hours of time. Click "Restore". Back in business. Less Than Five Minutes. No customers lost. No revenue lost. Retain customer loyalty. Forum Traffic. Ad revenue. Confidence of participants. Untold hours of time. Click "Restore". Back in business. Less Than Five Minutes. No traffic or revenue lost. Retain community loyalty. That's just a few examples. The list of potential disasters can go on and on. The amount of money it can cost you can reach the THOUSANDS if you run a successful business already. Is it worth the risk? Database Backup Generator is a Client Side, Stand Alone, Web Based, Instant Database Backup Tool for your website database(s). For the first time, you can instantly back up any, or all of your databases with just a few mouse clicks. Even better, once you set it up, it will do it for you automatically! And it even reminds you to download your backups in case you forget! Database Backup Generator Features Include: Back up any or all of your MySQL databases. Even from your other websites! Automatically backs up daily, weekly, monthly. Set and forget. Backup links automatically emailed to you for easy download. Download reminders automatically emailed to you if you don't download your backup files. Send your download links or your backup files to several email addresses at once! FTP your back ups to another server on the web instantly! Manual backups (with or without instant download) anytime. Manage your backups so you don't eat up your web space. Easy to use admin panel to manage all of your backup projects from one convenient location. Automatic, fast installation. Automatic, fast setup. On-Board pop up help system. Video Tutorials to walk you through installation, set up and use! Super Easy one click restore of any

database. Password protected. Does not use a database to store your backups. Why You Should Purchase Database Backup Generator Right Now! (You and I BOTH Know You Should . . .) Listen, your business means a lot to you. Your database of customers IS your business. It's your bread and butter. Why take chances? Database Backup Generator is an investment in your business! Even if you are just starting to build an opt-in list or forum or membership site, more and more of today's websites and scripts are becoming dependent on MySQL databases. When you build a site around a database, you need to consider the best way to protect yourself. And for the price of taking out your significant other to a GOOD dinner and a GOOD movie, you can have piece of mind.
