

Instant Pop-up Control

[DOWNLOAD HERE](#)

Now we're sure both you and your customers already have a Pop-Up generator on your PC - However, you don't have one like Instant Pop-Up Control! Yes IPC is a pop-up generator but this brand new, powerful script actually resides on your server. And it allows you to instantly swap and edit pop ups across ALL of your sites in seconds! The potential market for this incredible software is HUGE! And you will be supplying the demand! . . . You already know that using pop-ups to capture subscribers or advertise special offers is an effective marketing tool. And to achieve the best results you should put them on all your pages on all of your sites. But hardly anyone does because with multiple pages and multiple sites, modifying or changing pop up codes is time consuming and labour intensive. For that reason alone site owners are losing money/reducing signups because they're reluctant to change popup 'campaigns' manually. For example: Lets say your customer owns 10 sites, most of which have 4 or 5 pages (in reality it'll be more and we haven't even thought about AdSense/Content publishers yet...) - To change pop-ups site wide that's 40 or 50 page edits they'll need to make. How often would someone want to do that. Now consider someone publishing content with thousands of pages - no way could they do it. With Instant Pop-Up Control it takes just seconds to modify one page or one thousand and one pages . . . Can you see the awesome potential? Your customer logs into their admin panel, designs a pop-up (Ads, offers, subscription box etc.) then clicks a button - because they embedded one line of code into all their pages one time EVERYTHING CHANGES to a new POP-UP! You could switch between styles, types of Ad, sales copy, promote different products, swap autoresponders effortlessly and on a daily basis if you wanted to! We believe the demand for this type of software is in the tens of thousands - it could quite easily become a standard used everywhere
