Keep in touch with your prospects and build trust and credibility Date: December 2005 From: FBM RE: 101 INSTANT Chaser Letters Dear Entrepreneur, I know you're a busy person, so I'll get straight to the point.: I want to ask you a stupid question: What separates successful online marketers from the also rans? Yes, your answer is right. Effective follow up. Otherwise known as email marketing with sequential autoresponders. Follow up is the most important thing in online marketing. Statistics say that it takes at least 5 times for a potential customer to see your advertisement before they act on it, so it is a very rare occassion that a prospect buy your products on the first visit You must follow up or perish! Autoresponders can make you money if you have quality information to give your prospects. This is always one of the "biggest problems for marketers". You know you need to use autoresponders but what's your "response" going to be? Very few sales happen on the first point of contact. You have to follow up. You need to build rapport with your prospects, and instil confidence. They need to be persuaded they are making the right decision. This can take several follow up letters or emails. 60 of sales can be lost because the TIMING wasn't right for the prospect, or they were simply not followed up. You'd be amazed by the number of people who fail to follow up a prospect simply because they said "NO" the first time they were asked. Your ability to follow up prospects and enquiries is pivotal to your success in ANY business. Remember the rule - follow up, follow up, follow up. Now save time & money with your 101 INSTANT CHASER EMAILS. You would be right to think it can cost you time and profit to generate "perfect copy".
