"Finally - Here's A Quick & Easy Way To Create Great Looking PDF eBooks & Make Them Brandable On Any Computer - With Only One Piece Of Software!" Order Today And You Get The Rights to Sell This Powerful Script and Keep ALL the Profits! Click Here To Demo The Software From: Louis Allport Friday, 8:14 pm Dear Internet Friend, Viral eBooks are a great way to grow your online business. They're proven to work. And if you're not already using them, you're throwing away potential profits. Or perhaps you're already using them? But chances are you're still throwing away profits. Let me explain ... I'm talking about the EXE style eBooks. Those are the eBooks that \*only\* work on PC's. Why would you voluntarily choose to ignore all the Mac (and other computer) users of this world? You're just throwing away potential customers. One BIG Problem With "PC Only" eBooks Here's one huge problem with PC only eBooks... You know how those eBooks end in .EXE? Well - so do viruses! And you know how people feel about them. Do you really want people viewing your eBook with suspicion, before they've even opened it? Especially if they've paid you money for it. So what's the solution? PDF's of course - the most widely used eBook format on the internet. But, here's the tricky bit ... PDF's are not particularly easy to brand and make viral. Let me be more specific ... You can of course brand your PDF's by hand, but if you've got 1,000 affiliates, do you really want to spend your days creating 1,000 individual branded eBooks? And probably only 5 of affiliates will ever pass it on anyway! And there's of course software out there that helps you make PDF's brandable, but they currently have one MAJOR drawback - the software only works on PC! (Yup, that puzzles me too.) And not only that, but you usually need to buy software to create the PDF, then a second piece of software to brand the PDF - you're paying twice when you really don't need to be. But there wasn't really an alternative until now ... Introducing -- PDF Branding That Works On \*Any\* Computer! Here's the solution: "A script that allows your visitors to enter their links in a web page. They then press a button and the PDF is automatically created with their links in it." Sounds easy? Well ... One person who had such a script written revealed the cost to me: \$10,000 in programming costs! And they weren't even selling it to anyone - it was just for their own use. Here's How To Avoid \$10,000 In Programming Costs ... I'm sure you'll be happy to hear you certainly won't have to find that

kind of money to create a viral PDF sales force! I've recently worked closely with a software developer to create the Custom PDF Maker script... Here's A Live Demo Of The "Custom PDF Maker" Script ... Go to this link right now to see the script in action: [allportpublishing.com/CustomPDF/index.php](http://allportpublishing.com/CustomPDF/index.php) All you have to do is enter some details if you like, press the button, and within a couple of seconds the script will have created the PDF customized with your details. You can then download it and see how it looks. As soon as you get this script you'll be able to start creating your own brandable PDF's so you can do the same for your affiliates and customers!

### What You Need For This Script To Work

Let me be very clear here - like all scripts there's certain things it needs: You of course need a hosting account. If you don't currently have one I can recommend this one - [click here to try them out free for 30 days with no obligation](#). You must be able to install scripts on your web host. Most allow you to install scripts (our recommended web host certainly does). Your web host must also support PHP 4 or higher. That's what the script needs to run. (Our recommended web host supports this fully.) So that's what you need on the web hosting side of things. Like any scripts if you're going to install it yourself, you need some experience with this. I must tell you this script is very easy to install. It literally takes two minutes. BUT - you must be comfortable with FTP (uploading files to your web site) and it's strongly recommended you've done at least one install before. You of course get full instructions with the script on how to successfully install it . If you're still not comfortable doing the installation, we'll be happy to talk you through it at the support forum, or we can recommend people who will install it for you for a reasonable fee. And there's another skill it's strongly recommended you already have to use this script successfully - Experience with HTML code. Because this script converts HTML to PDF, it has to be clean code. This requires you to be comfortable working with HTML code. If you've had no experience working with HTML code, it will probably take you a while getting used to working with this script. However, if you want to purchase it just for the reprint rights so you can make profits selling it to others - please feel free!

### You Get Unlimited Product Support (Yes, Really)

I insist you're fully supported as you use this software. However - because this script comes with master reprint rights I can't support everyone by email of course. Let me be clear about that - email support is not included with this script. However - full, detailed, unlimited support is offered in the support area of our forum - you can visit it [here](#). If you have any questions about the script before purchasing it, or any time after, you'll get a ton of help there. Once you get this script you're certainly not on your own - that's a promise!

### Here's Exactly What You Get:

As soon as you order this script, you'll get immediate

access to a 19 page PDF. This PDF will: Introduce you to the script. Give you the private details so that you can download the script. You'll also get all future updates completely free in this private area! It will talk you through installing the script. And it will talk you through getting started creating your own brandable PDF's. You also get full sales materials so you can start profiting by selling this script yourself... Special Bonus If You Order Right Now Free Reprint Rights - You Keep 100 of The Money! This is better than any affiliate program that pays you 25 or even 70! As soon as you get your hands on this product, you can sell it yourself, and keep every single cent you make! All it takes is one sale, and you've made your purchase back! Everything after that is pure profit, straight into your pocket. And you get everything you see here: the professionally written and designed web site and sales letter, so you really don't have to do anything ... just upload the files to your website, and start making money. Your Purchase Is 100 Guaranteed If for any reason at all, at any time at all, you would like your purchase refunded, no problem. I want you as a happy customer. If you're not happy with this product for any reason at all, just drop me a line (my full details are at the bottom of this letter) and I'll return every single cent of your money within one working day. That's more than a guarantee ... it's a personal promise from me to you. Get your copy of the Custom PDF Maker script today for only \$5.00... place your order and you'll have full access within seconds... Sincerely, Tracy Yates, & Louis Allport (Author) P.S.
