Soundtap Streaming Audio Recorder

[DOWNLOAD HERE](#)

SoundTap lets you record just about any audio that plays through your Windows computer including streaming radio, VoIP calls and Instant Messaging conversations. Simply install this software, turn it on and then all sound played on or through the PC will be recorded as wav or mp3 files. All audio is 'taped' by a virtual driver directly within the kernel so the process is perfect digital quality.SoundTap Streaming Audio Recorder specifications: Download Size: 277 KB   Other System Requirements: For technical reasons Windows 2000 only supports recording what you play not the input side.
