I have been getting hate emails from my prospects and customers because they accused me of not replying to their emails. A few of them even asked for refund and tried to do a chargeback. They thought I was a scammer who had ripped them off their hard earned money and did not deliver the products to them. The truth is I DID reply to ALL of their emails. However, some of the emails did NOT reach the recipients' inboxes. Sounds familiar? This Is The REAL Situation That We Are Living In Right Now Legitimate emails are wrongly getting blocked by spam filters. Due to the overwhelming spam problems, ISPs and email service providers have been extremely tough on blocking spam emails. It is good though BUT we are seeing now that even legitimate emails are wrongly being blocked. Imagine this: Customers swear and curse you because they claim that you do not send them the email download instructions. Your prospects or potential buyers reach your site and they seem interested in your product. But before that, they need to confirm with you something so they ask you some questions. You reply all their emails BUT somehow the messages do not reach their inboxes. Guess what? LOST SALES! -- LOST THEIR TRUST ON YOU! Imagine How Much Money You Have Lost Surely you don't want to find yourself in that situation do you? That is why you must NOT rely on emails. Instead you should use a customer support system so that messages are 'written and read' on the webpage instead of going through emails. But Installing A Customer Support System Script Can Be A Daunting Task You know something? I've been in your situation before. I can't wait to get started making money online but as I

progress on all the necessary tasks step-by-step, there seems to be HUGE obstacles along the way.
