Discover how to get targeted traffic to any site for free... "The people who know these secrets are quietly siphoning off all the free traffic for themselves while everyone else who tries it is left with the scraps!"

Dear Friend, Are you making money online yet? Do you have a website that is a like a ghost town while everyone else gets traffic like Disney Land? Well traffic is the key to online success, even if you master everything else then without a steady stream of targeted prospects visiting your site then you are still going to starve. What if I told you there was a source of traffic rich for the taking that people plunder everyday, a seam of traffic gold which people mine ruthlessly while everyone else who tries to use it just hits stone? Look I bet you already know about using articles to drive traffic to your site, at least in the traditional sense anyway, and you've probably tried submitting a few, only to get lousy results and give up. I'm here to end your article misery and allow you to tap straight into the heart of this incredible source of traffic: Introducing 'Article Cannon' Articles have been a solid source of traffic, links and reputation for years, and the top article directories are going from strength to strength (as well as new ones popping up all the time!). What does that tell you? It tells me that article marketing is just as hot now as in the past, and that it is here to stay, oh sure videos are starting to get good traffic - but everyone and their dog can create a video and stick it up on those sites, so your video instantly gets drowned by 50 others in 10 seconds and nobody ever finds it. Articles allow you to hardwire into the other persons head, as they are reading YOUR article then they start to form opinions about you, they start to bond with you, they start to see you as an expert, which means by the time they hit your resource box then they already think of you as a person who can help them with the problems they have! That gives you superb quality, targeted traffic, not just junk traffic in huge numbers like most people pose about nowadays, I don't care if you can get 1000 visitors a day with some spammy technique and get lots of schoolchildren visiting your site, I want targeted traffic that converts into sales, I want eyeballs that want to see what I have to offer, not just figures to inflate my website stats so I can then turn around and sell people a course on how I got 1000 visitors a day with some crappy technique! Traffic is useless unless it is targeted and articles give you red hot targeted traffic! Here is what you could be learning just minutes from now! The two totally different

ways to get traffic with articles and how to craft the perfect article for each way... (most people just use one way!) How to find out which day you need to submit on to get the maximum traffic in the shortest amount of time. My 3 step system to getting articles ranked in the search engines and funneling traffic to your site How to craft attention grabbing resource boxes that almost force people to click through to your site! (mess this part up and you might as well give up) How to write about topics you know absolutely nothing about in just minutes... The truth about spinning articles and how you should be doing it if you really want the articles to be usable! The web 2.0 sites you can use to supercharge your article marketing efforts How to write articles lightning fast and THEN how to increase your productivity by 50 as well... (this is simple but brutally effective!) and so much more!
