Guerilla Mailer Newsletter Script - with Master Resell Rights: This is a little script you can use for sending out your newsletters out every day! The script is very small - less than 20k, but extremely POWERFUL as you'll see in a moment. Top features: 1. Easy Installation: It's a PHP script. It does not require ANY configuration. You don't have to "CHMOD", or set permissions or set 'paths' or anything. Just upload it to your web host and mail. This script will work on any host that supports PHP 4.03 or higher... and that's all you really need to start using it. So, it's completely portable, light-weight and can go with you to any hosting provider you want and you don't need a team of tech experts to help you set it up on your hosting account. 2. Powerful: It's also a very powerful script. It allows you to upload your list with one click. In one test I did I easily loaded a list of 23,119 into the script without problem. I'm not sure what the max number is, but it's powerful enough for most ezine publishers. You can also run more than one instance of the script for split testing, etc...! 3. Personalization: It also allows you to personalize each and every message sent. For example you have a subscriber called "John". You can include his name anywhere in the message you want. If you want to remind him that he signed up from IP "xxx.xxx.xx.xxx" you can also include that in the message and it will automatically 'Merge' each field into each message you send. And you can include up to 12 custom fields for merging. You could include the persons mailing address,

phone number or other identifying info so they know you are not sending them spam. 4. Message throttling: Another great thing about this script is that it allows you to send each message on a 'delay'... this is useful, for example, if you are on a shared server. You do not want to over-stress the server if you're sending a lot of emails at one time. You can set the delay at 3 seconds, 9 seconds or any amount you want. This is also important for getting your messages delivered to AOL, Hotmail and Yahoo subscriber accounts. These email providers will block your message if you send them one after another, so by setting a delay it looks more like 'friendly' mail and not bulk mail. In recent test more than 88 of the emails sent with my script were delivered - compared to only 47 with a program that delivers email from my desktop. 5. Cloaking: This script also has a 'cloaking' feature that I only reveal to the people who want to use the script. As long as you use a valid email address when sending your mail, a valid method of 'opting' out of your list and include your physical mailing address in the body of the message then you're Can-Spam compliant. 6. Split testing: One last feature of this script makes it even more powerful: Split testing. Let's say you have a list of 5,000 and you want to test two different emails. There is a 'Max email' setting that allows you to create your message, and if you enter 2,500 into the "Max email" setting the program will stop after the first 2,500 emails have been sent. Then you can paste your second message into the script and press 'send' to deliver your second message to the remaining 2,500. The script will automatically pick-up where it left off with your new message, instead of your first message.

***** Script 6: Split-Test Script - with Private Label Rights: Do You Want MORE Sales? What would it be worth to you if you could find out exactly what worked and what didn't on your sales letter? Or better yet, what if somebody told you, and specifically pointed out certain problem spots on your web site that are decreasing sales? So what's the answer? The answer is "split

testing". Split testing is where you send traffic to 2 (or more) different sales pages. Each sales page has one piece of it different from the other. Here is an example; Visitor A goes to sales page one. Visitor B goes to sales page 2. Visitor C goes to sales page one again and so on. The only difference between sales page one and sales page two is the one section of the sales letter that you are testing. For instance - headlines. Here are a few things you should be split testing on a regular basis: - Your sales letter's headlines - Your opening - Your sub-headlines - Your guarantee - Different web site designs - Your close or call to action - Your order form And more Then, you tally up how many sales came from sales page one, and then how many sales that sales page two generated. Whichever sales pages generated more sales is the one that is more effective, meaning it makes you more money with the same amount of traffic!

Split testing is the easiest way to increase profits without increasing expenses. All you need is some specific software that will handle the whole split testing process for you. A "set it and forget it" technology that literally works in the background, making your more money every day. Introducing "The Profit Discovery Split Test Marketing System!" Introducing "The Opt-In Motivator" This is the MUST HAVE tool if you want to motivate subscribers to take action and join your upcoming tele-seminars, memberships or even if you just want to test the effectiveness of each opt-in page you have.

2 Ways to Motivate People to Subscribe

1.) Limit The Total Number of Subscribers: This motivational tactic tells visitors that you will only limit access to something of value to x number of subscribers. For instance, they will see there are only 200 people allowed to subscribe and there are only 47 spots left! Imagine if you are hosting a tele-seminar and people see spots are being taken away by the minute! Another way to use this method is to limit a FREE report. As of now, free reports are considered to be nothing special and have very little value attached to them. Imagine, from this point forward, you only allow 200 people to read this report. How many more people will be willing to opt-in compared to when they visit a plain old opt-in form? Of course, you can limit it to 500 people (or any number you prefer) or you can create a TIME campaign.

2.) Limit The Amount of TIME People Can Subscribe: Imagine if you are offering a free membership or even free software. While most people take squeeze pages for granted they also realize the importance of time-sensitive deadlines. By having your opt-in pages offer real-time countdowns, even to the second, your visitors will realize that if they do not act now they WILL LOSE OUT forever. The best part about all of this, though, is that it is fully automated. All you do is use a form in the admin panel and the Opt-In Motivator does all of the work for you. Of course, being able to motivate people to subscribe is the most important benefit. However, there are other benefits that come with this tool. With The Opt-In Motivator, You Will Also:

- * Receive Real Time Reporting On Referring Traffic Will real-time reporting, you can determine which sources referred traffic to your opt-in page. So, you will be able to tell if it comes from search engines, affiliates or even e-zine articles. In essence, you will be able to see which sources are providing you with the traffic needed to build your list. This information will help you determine which referral sources are worth your time and which ones are not.
- * View Keywords From Google, MSN And Yahoo If you receive traffic from Google, MSN or Yahoo, you will see it instantly in your admin panel and you will see which keywords were used to bring them to your opt-in page!
- * Receive Real Time Conversion Ratio Comparisons Between Different Campaigns There is a lot of money that you can lose if you do not know how effective your campaigns are. Pay attention to how many subscribers you receive as well as how many conversions you receive. This is just another reason to invest in the Opt-In Motivator. Basically, you are receiving 3 powerful tools in one:

A.) A Handy Opt-In Ratio Measuring Tool
B.) A Handy Stat Tracker For Your Opt-In Pages
C.) A

"Fire In The Pants" Motivator To Get People To Join Your List/Seminars/Etc

***** Script 17: ClickBank Multi-Product Manager - with Master Resell

Rights: Clickbank allows you to sell about 500 items in one account BUT they allow you to add ONLY one landing page for your affiliates. You can have several thank you pages, and sales letters for each product BUT ONLY one ClickBank affiliate link (hoplink) which looks like this: affiliate.vendor.hop.clickbank.net Now, if you wanted to have affiliates promote your products you would have to add all your products to ONE landing page, or to register for additional Clickbank accounts for every new product you add to your product line (about \$50 for every new account)! This is a big error on ClickBank's part because affiliates can't send you targeted traffic to a page full of different products... For example, if you want to promote 3 products with affiliate partners, then you have to create 3 Clickbank accounts for each product and provide affiliate links individually. Here is an easy solution for you! Using "Clickbank Multi-Product-Manager" Script, you will be able to create any number of affiliate links that can be used in a Single ClickBank Account. Clickbank Multi-Product-Manager is an easy to use Affiliate management program for ClickBank Merchants. Salient features of the script: 1. All products will be promoted with Separated Affiliate Links in a SINGLE ClickBank Account. 2. Easily add new products! Just enter the product number, product name and product website URL and the script will create a unique affiliate link. 3. Easily Get URLs for your affiliates: When you click on the "Affiliate URL'S" link, you will get the affiliate link for each of your products that you should give to your affiliates to promote.

***** Script 18: LikeList Facebook Viral Traffic Script - with Master

Resell Rights: I'll explain it simply. What this does is to help you easily create a quotes website that Facebook users can "like" and that is heavily focused around this. Since the stuff they like show up in

their Facebook profile and consequently in the news feed of their friends, this makes the whole website EXTREMELY viral! Except of text quotes, there can also be pictures and YouTube videos! Also, websites created with LikeList are sentenced to live and grow on autopilot because users add their own things! Top benefits of using LikeList: -After you set up your site and with literally next to zero promotion, by the time the first users start using your site, more users will follow, that will bring even more, and then EVEN MORE, etc, while you sit and watch your earnings skyrocket! -The other huge part of LikeList is that all the entries of your sites are actually FACEBOOK PAGES. This means that if the top 50 entries have been liked by 100.000 people, then you have also 50 PAGES WITH 100.000 FANS, that you can send updates AGAIN AND AGAIN!!! And since the whole website is built around liking things, these numbers are easily achievable! You'll have a HUGE user base in no time! -There is an integrated CMS with a full WYSIWYG editor, with which you can easily create pages integrated in the website (that can also be liked and be virally spread over Facebook!). What, even THAT isn't enough for you? Well, there is even an integrated feature to add an e-mail sign up form with an "export as .csv" option. -There are also features such as daily trending quotes, an integrated ad manager, full integration with other Facebook functions, and many more (check below)! -On top of all these, you get the options to add social features to your site, like a comment box feature, or an activity feed that shows the users that did the latest likes. With all these, your visitors will not want to leave the site and will make it a money generating machine. -Finally -and maybe the best of all: you can make a NETWORK of INTERCONNECTED sites, that grow on top of each other, and work as a really big automated site! My 3 TEST sites together get MORE THAN 50.000 daily visitors in a small country! -LikeList is virtually bug free, it's fast and light for the user AND the server, it's easily customizable, it's REALLY secured, and the design and architecture are tweaked so to give the best feeling when browsing the site. Most important and unique features are: * Easy and efficient design. * Supports Text, Image, YouTube likes. * Practical admin panel providing many useful tools. * Pinning feature - You can put a specific entry on top of all others, which can be a up as suggested in each page load (this can also be a text link or a banner!) * You can add FULL HTML CUSTOMIZATION on any entry you enter from the admin panel. * CMS with a fully functional WYSIWYG editor (so you can easily create additional pages for whatever you want). * Integrated ad manager. * Show trending, latest, top and random quotes, and the ability to sort these as you like. * Optional "Add your e-mail" form. * SEO friendly URLs. * Social activity feed to show latest people that have liked something. * Facebook comments on

every page - your users can comment on each page, and it will also show up on their FACEBOOK profile, making this even more viral! * Optional Facebook comment box - this works like a shout box, letting your users talk about anything. * Security from spambots using Google's ReCaptcha technology. * RSS feeds, to be used for SEO as well as anything else you could use them in! * Ability to like whole pages. * Adding and deleting entries. * Users can report entries that should be deleted * EVERYTHING you read above is easily customizable. ***** Here is A Summary of Everything You will Get in This Package: Script 1.
