Mobile Site Bot -create Your Own Mobile Site Easy Plr

"How Would You Like to Be Able To Tap Into Over $5 Billion in Sales That 91 of Your Competitors Can't Even Touch?" Smart Mobile Devices are THE Place to Be Right Now and Most Sites Look So Hideous That Customers Can't Even Use Them . . . Let Me Tell You How You Can Be One Of The Few That Can! Dear Online Entrepreneur, Here are some important facts you should know: Number of SmartPhones Sold 1. In 2008, there were 131 million smartphones sold worldwide. 2. In 2009, the number of smartphones sold worldwide exceeded 180 million. 3. By 2013, the number of smartphones sold annually is expected to top 300 million. 4. The number of smartphone users is expected to exceed 1 billion worldwide by 2014. And, that's just people with smartphone not all cell phones. However, that's not the important part, look at these facts: Purchase Abandonment While Using SmartPhones 1. 45 of smartphones owners abandoned the sales process because the site would not load on their phone. 2. An additional 38 left the site because it was not developed specifically for smartphone users and was too hard to use. 3. Another 8 of smartphone owners that tried to purchase a product on their device were unable to do so for unspecified reasons. Do you understand what that means? Yes, BU of smartphone users were unable to make a purchase when they had their credit card out and wanted to buy. They wanted to buy and couldn't. They might have been on your website and it might have been you that lost the sale. It's Time to STOP Losing Sales and Start Picking Up All Those Sales Your Competitors Are Losing! As you see above, the majority of mobile phones users are browsing, searching and buying on the Internet using their handsets. When you design your websites, if you only design them for PC viewing then you need to seriously consider how they'll look and work on mobile devices. As the mobile Internet has developed, people expect the same standards when browsing on their handsets as when they're on they're PCs. To make a website look good on a mobile phone like an iPhone takes a lot of special programming to make it work and, as a marketer, you don't want your pages to just work, you want your pages to stand out from your competitors and shine! The problem is you don't have the slightest idea how to do that and, guess what, it's easier said then done. Which One Do You Want Your Site to Look Like? Bad Mobile Site Good Mobile Site How to Steal Your Competitors Mobile Customers . . . That's easy, just

build a mobile-friendly site. Here's how... The layout of your website MUST be properly formatted to display properly on mobile phones. Instead of worrying whether people can see your pages, by far the easiest method to handle cell/smart phone users is to simply put a link at the top of your pages that point to your mobile version. Then your site visitors can select whether they want to see the mobile version or continue with the normal version. I know what you're saying, "How do I create mobile friendly sites? And isn't it expensive?" Good questions. Keep reading... To create a mobile website you need to have pages in a mobile markup language such as WML or CHTML. To create that over and over again can indeed be expensive. However, there's a better solution. Introducing Mobile Site Bot! mobilesitebotscript box cover Mobile Site Bot is a software program that will help you quickly and easily create Web site after Web site by using the built-in templates or you can create any number of templates to build your pages from. And these sites will be completely mobile device ready. Meaning: * Save the time, expense and trouble of creating multiple sites for different devices -- create it once and it works on multiple devices. * Save the time, expense and trouble of maintaining multiple sites for different devices -- change it once and it's changed for multiple devices. * Stop reinventing the wheel, quickly create Web page from pre-defined templates and use them for the Web pages throughout your Website or on as many websites as you'd like. * Make all those sales that your competitors can't because they don't have mobile ready sites. The total number of mobile devices in the world exceeds the number of desktop and computers you must be thinking mobile. ABI Research published a report recently on that in the U.S. the mobile market will reach $5 billion in 2010. And remember that 91 of mobile users abandoned their purchases because of problems with the website they were trying to use. Mobile Site Bot will help you to breakthrough the barrier of mobile device websites and deliver your content, messages, and promotions to mobile users everywhere and get yourself a piece of those billions -- after all, your competitors aren't! You Can Capture More Than Your Share of Mobile Users and . . . Get a Deal That Will Stop You In Your Tracks Creating mobile-friendly content has quickly become a "must have" by those who want to be successful in this decade. But to have a someone create you a mobile friendly website can cost you $1,000 or more depending upon the size and content of the site. And that's for just one site, if you have others then you'll have to pay that for each one. There are some free solutions but they are incomplete, generally require a level of technical knowledge you won't have and, even after all that, require a lot of time to setup for each site. Do you really have the time and desire for that? Particularly when Mobile Site Bot can create

mobile-friendly websites quickly and easily for a small fraction of the cost of having someone create just one website for you.
