Dub Layers Apple-loops (.aif)

[DOWNLOAD HERE](#)

Dub Layers features a hard-hitting collection of modern dub elements. Complete with booming baselines, organ and key skanks, tweaked synth and FX sounds and sharp drum kits, this diverse set of layers can be used to create your own version of dub. Each sound is not over processed as to leave the freedom of dubbing out the sounds to the end user. This 1.5 GB library consists of 15 quality construction-kits with each kit containing 3 mixes, 3 drum mixes, drum hits and deconstructed loop components (drum layers, bass, keys, guitar, synth and more). With a total of 270 drum hits and nearly 400 loops, this collection is a strong addition to the dub producers studio.
