Quorum Call Conference Software

[DOWNLOAD HERE](#)

Quorum is software which runs as a phone conference server on any Windows PC. Callers dial into the server to join telephone conferences. Callers can connect to a conference call using either standard or VoIP lines on external telephone numbers or through an office phone system. The number of people who can join a conference call is limited only by your bandwidth.Quorum Call Conference Software specifications: Download Size: 1133 KB   Other System Requirements: PSTN Lines or VoIP Quorum Call Conference Software supportSupport email: supportnch@nchsoftware.comPhone: (303) 557-0211Quorum Call Conference Software manufacturerNCH Software6120 Greenwood Plaza BlvdSte. 12080111 Greenwood Villagenchsoftware.comTags: business meetings, phone meetings, conference calling, conference call, business telephone software
